N4 INDIVIDUAL SOLUTIONS

TAILOR-MADE SOFTWARE, AS STANDARD IS OFTEN NOT ENOUGH.

N4

we solve it

READY FOR DIGITAL TRANSFORMATION?

OUR SOFTWARE –
AS INDIVIDUAL AS YOU ARE!

Digital transformation has long since arrived in the B2B business. Process structures and complex workflows that have evolved over many years are being re-evaluated, structured, and digitally mapped. Depending on its industry and size, every company is confronted with different challenges. In our opinion, off-the-shelf software does not meet these diverse requirements.

Together, we implement a product tailored to your company in an agile development process unique in the literal sense. No matter what industry you operate in and what requirements arise, thanks to the precise analysis of your processes and state-of-the-art technologies, we deliver adaptable, future-proof solutions.

And create the best conditions for a significant increase in efficiency and guaranteed competitive advantages in an increasingly fast-paced, digitalized world through targeted process optimization!

To maximize the potential of digitization, our guiding principle is that individual processes require individual solutions. Where standard solutions fall short, we create an all-inclusive package of tailor-made software for our customers that helps to automate and simplify their processes.

head of digital transformation

WHY YOU SHOULD WORK WITH US?

ANALYSIS-BASED PROCESS UNDERSTANDING

We understand your business model and provide you with long-term advice on the holistic optimization of your processes – from vision and objectives to stakeholder management.

ALL-INCLUSIVE PACKAGE

Whether consulting, training, development, testing, maintenance, or advancement, we offer excellent all-inclusive support from a single source as a competent partner.

STATE-OF-THE-ART TECHNOLOGY

"Nothing is as old as yesterday's newspaper," they say. IT shares a similar view. To create fail-safe solutions, we rely on the most advanced technologies in development.

COOPERATION BASED ON PARTNERSHIP

"Teamwork makes the dream work." That is why we always work at eye level, both with the customer and within the team, and thus develop impressive solutions.

AGILE SOFTWARE DEVELOPMENT

Agile development is not just a method for us but our attitude. We continuously test the efficiency of functions to achieve the best result together with you.
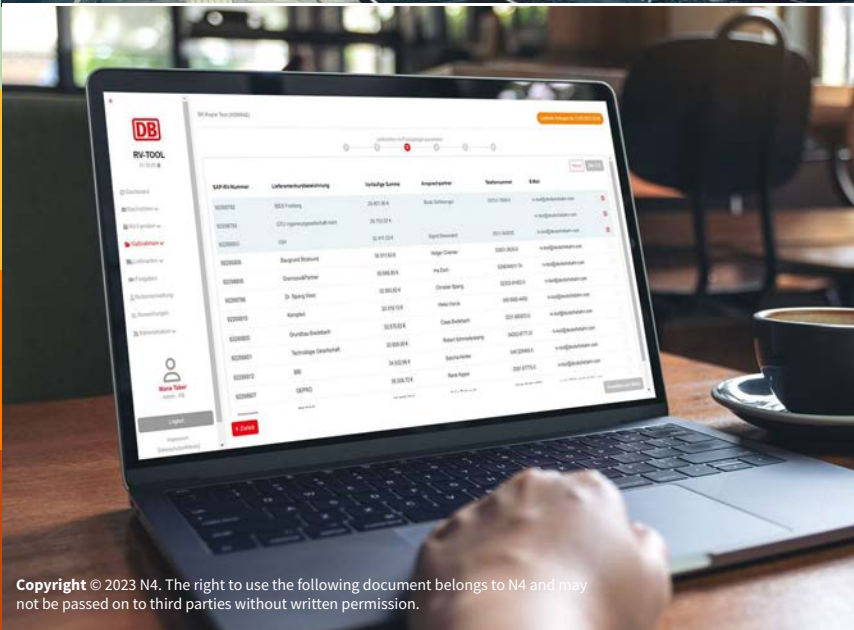

OUR SOFTWARE IN PRACTICE

DB

MORE EFFICIENCY IN FRAMEWORK AGREEMENT RETRIEVALS THANKS TO CLOUD-BASED APPLICATION

CHALLENGE

- Loss of time due to a decentralized organization of framework agreement families in 16 different tools
- Increased safety and efficiency requirements

SOLUTION

- Cloud-based web application for determining the most economical framework agreement partners
- Group-wide use of a bundled system instead of several individual programs
- Significant time savings through direct supplier queries in one tool without media discontinuity

we solve it

DB

WITH A CENTRAL ALL-IN-ONE SOLUTION, CONSTRUCTION SITE PLANNING IS A BREEZE

CHALLENGE

- Combination of the needs of bidders (architects' and engineers' offices) and buyers of Deutsche Bahn

- Large quantities of relevant documents related to planning, construction supervision, and project management

SOLUTION

- Customized web application with structured configuration functionality as well as automated calculation

- Support of users in the calculation of fees according to the Ordinance on Architects' and Engineers' Fees (HOAI) as well as the final review and comparison of bids
